PROJECTS

Ola Dataset — Ride Analytics ↗ GitHub

Tools: Python, Pandas, Looker Studio, Excel

- Analyzed large-scale Ola ride datasets to uncover booking trends, cancellation patterns, and peak demand windows across regions
- Performed end-to-end data cleaning and exploratory data analysis using Python and Pandas to identify driver behavior and revenue anomalies
- Built an interactive Looker Studio dashboard to visualize ride distribution, demand heatmaps, and customer segments
- Delivered data-driven insights supporting operational decisions on fleet allocation and pricing strategy

Hospital Readmission Optimization ↗ GitHub

Tools: Tableau, Python, Excel

- Conducted end-to-end analysis on a healthcare dataset to evaluate patient readmission trends and identify high-risk segments
- Applied statistical analysis and EDA to uncover key readmission drivers including diagnosis category, discharge disposition, and length of stay
- Developed a multi-dashboard Tableau solution covering readmission overview, root cause analysis, and executive summary
- Provided actionable recommendations to optimize hospital workflows and support strategies to reduce 30-day readmission rates
